Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8-10, and 15-27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Markowicz et al US Patent 4,842,278. Markowicz discloses a worldwide lottery system where similar games of chance are played in different jurisdictions. Columns 2 and 3 state that the games can be a plurality of lottery type games as long as each is the same and operates under the same rules.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 11-14, and 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Markowicz et al US Patent 4,842,278 as applied to the claims above in further view of Olson US Patent 6,554,710. Markowicz discloses all of the instant application as disclosed above but lacks in disclosing specific network and communications. Instead Markowicz discloses in column 3 that a network can connect the lotteries. In an analogous invention to Olson discloses a lotto gaming method where a worldwide lottery is run over the Internet where (column 5) multiple lotteries are run at

the same time and that a player has multiple opportunities to win. Column 5-7 also discloses a home lotto program interconnected by the internet where a personnel account is set up to play the game. It would have been obvious to one of ordinary skill in the art to combine the reference of Markowicz and Olson given the motivation in Markowicz that the network can include regional or dispersed groupings ie multi state worldwide, to have a worldwide lottery with specific communication means as taught by Olsen.

Citation of Pertinent Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following reference are related to lotteries: Luciano et al '521, Oconnor et al '510, Yoseloff '143, Walker et al '640, Sarno '641, Caro '109, Olson '959, Torango '968.
